EXPERIENCE DETAILS

AEM Front End Developer

Talos digital - Medellín, Colombia

2020 - current

-Hillrom.com:

Front end developer for AEM website in the creation of a customer portal where users are able to submit cases for their broken machines and other issues, also with a section about knowledge and courses center.

React.js as the main front end development framework with Sass, grunt and webpack as helpers and bundlers for dispatching code to production.

Front End Developer

Xumak - Medellín, Colombia

2019 - 2020

-Kennametal.com:

Lead front end developer for AEM website, creating custom templates and components with authorable design and content options so admins could customize the website as they needed.

Integrating Hybris ecommerce platform with AEM front end side, creating type ahead product search, PLP/PDP front end development and integration of 3D CDS Cad product models, allowing users to have a full ecommerce experience inside AEM website.

Worked in the creation of a collaboration space dashboard where users were able to group products on projects, solutions and machines, making easy the process of creation, edition and sharing of these product groups.

- Digicelgroup.com:

Worked as front end developer on cellphone caribbean AEM website, creating and extending current components to allow author full customization of the website.

Vue.js was the main front end development framework, with Sass as style CSS extension. Gulp was used as a task helper and webpack as a bundler to dispatch front end code to AEM/production.

Wordpress Front End Developer

Magnify Studios - San Juan, Puerto Rico
2013 - 2018

Worked as a remote front end developer for more than five years, developed more than 100+ wordpress websites for companies in Puerto Rico and USA, converting designs in creative and dynamic pixel perfect websites and ecommerce platforms.

Technologies used: Wordpress, HTML5, CSS3, PHP, Angular, Gulp, Woocommerce

Front End Developer

Altotrafico.co - Medellin, Colombia
2012 - 2013

Worked as in house front end developer, developed sites in Joomla! transforming designs in creative and dynamic websites for important companies in the city of Medellin.

Technologies used: Joomla!, HTML5, CSS3, PHP

INTERESTS

Some of the technologies I'm very interested in right now are improving my react knowledge and flutter for mobile app development. Also, one of my dreams is to start my path as a full stack developer with golang as BE.
